

Our doors are at their best when the weather is at its worst.

For all you know, it could be blowing a gale outside, lashing rain or hailstones. Maybe all three at once. But you can't hear the wind's howl or feel the temperature drop. That's because you have **janus Doors** front door. Triple glazed, double rebated and twice the thickness of most others, it effortlessly keeps mother nature's wildest tantrums at bay.

A DECISION TO PLEASE BOTH HEAD AND HEART

Having one of the world's most energy efficient doors is a smart decision for wise heads. But it's the way it repels the blatter of rain and silences the wind's howl that warms the heart. Fingers and toes too.

Doors that sound as good as they look.

All Apeer 70mm doors are triple glazed as standard. Glass designs shown in sidelights may vary depending on sidelight width. Coloured film in glass designs is not an exact match to the door colour.

ANTI-VIRAL Door Handle

Our new anti-viral handle has an antimicrobial surface. Its high level of hygienic safety has been confirmed in independent laboratory and practical tests.

The coating on the handle contains silver ions that prevent the growth of germs.

The silver destroys the cell membrane of the germs and therefore blocks cell respiration and cell ingestion. Cell division stops; the germ dies.

Independent tests have shown that the ion coating reduces the growth of germs in this way by more than 99% – even with regular cleaning, and it requires no maintenance.

1. High bacterial load on the surface

2. Silver ions destroy the cell membrane of the germ

3. Germ is killed

4. There is a significant reduction in the bacterial load on the surface
