

# janus *Doors*

Our doors are at their best when the weather is at its worst.

For all you know, it could be blowing a gale outside, lashing rain or hailstones. Maybe all three at once. But you can't hear the wind's howl or feel the temperature drop. That's because you have **janus Doors** front door. Triple glazed, double rebated and twice the thickness of most others, it effortlessly keeps mother nature's wildest tantrums at bay.

### VIRTUALLY AIRTIGHT

Our double sealed rebate is virtually airtight by creating an internal secondary seal.

### EXTRA INSULATION

Along with our 70mm super-strong, highly insulating polyurethane core, glass elements are triple glazed for extra insulation. We can even gas-fill them for improved thermal performance.

Glazed units are also available with Low E glass and can be gas filled to offer improved thermal performance. \*Low E glass is only available in clear.

### A DECISION TO PLEASE BOTH HEAD AND HEART

Having one of the world's most energy efficient doors is a smart decision for wise heads. But it's the way it repels the blatter of rain and silences the wind's howl that warms the heart. Fingers and toes too.

Good for the planet.  
Even better for your wallet.

Sealing heat in while keeping cold out, they are **A-Rated** by independent testers and far exceed the industry benchmark. By keeping more heat in your home, you'll keep more cash in your wallet.

Strength from within.

**janus Doors** 70mm door there's a super-strong steel and metal reinforcing that forms part of the highly insulating polyurethane core. And with a vertical steel bar running top to bottom along the inside edge, our doors far exceed Police-approved security standards.

Extremely strong vertical steel reinforcing bar adds rigidity and security.

Super-strong, metal reinforced, highly insulating polyurethane core.

We've got your back.  
And your front.

**janus Doors** you'll have the weight of our entire design team and security specialists protecting you and your home from intruders. Our doors comfortably exceed all industry standard impact and cut-through tests.

Secured by Design doors must be ordered with laminated glass.

Toughened, triple glazing housed in reinforced mouldings with the optional extra of laminate glass for optimum security.

Extremely strong vertical steel reinforcing bar in our doors adds rigidity and security.

A strong coupling bar adds strength and stability.

Multi-point Yale locking system features two rollers, three hooks, two deadbolts and a latch. It secures the door from top to bottom.

Perfectly yours.  
You pick the colour, we match it.

Express your individuality with a virtually infinite combination of door styles, colours, glazing and accessories. If one of our 27 hues isn't exactly what you're looking for, our manufacturing process enables you to match your door to most colours. Simply bring along a RAL or BS colour reference and we'll match it.

#### LOVE ELEPHANTS?

We can colour match to your favourite animal - even if it's an elephant.

Metallic Colours are not available. There is an extra charge for Premium and RAL/BS colours. We may not be able to match all RAL/BS colours.

Check out our standard and premium colour palettes.

LOW MAINTENANCE

Metallic Colours are not available. There is an extra charge for Premium and RAL/BS colours. We may not be able to match all RAL/BS colours.

Agate Grey is part of our standard colour range.

Add a personal touch with bespoke, handcrafted glass designs.

You've chosen the door style and picked a colour that perfectly complements your home. Now for the finishing touch: glass designed by you and handcrafted by our in-house artisan glaziers.

CLEARLY YOURS

Our in-house glaziers have pulled together some of their favourite, on-trend designs. They are available across our range and are an easy way to make it clear that it's more than just a door - it's a welcome new addition to your family.

Doors that sound as good as they look.

The solid 'thwump' when you close an Apeer door sounds like no other. It's a signal of its superior construction, reinforced frame and virtually airtight seals. 'Thwump' - it's short for great looks, safer homes and cosy nights in by the fire.

**janus Doors**. Whether you choose the 70mm thick double rebate seal, or the ingenuity of the 44mm thick single rebate seal, both perform exceptionally well in terms of energy efficiency, security and appearance.

**70mm Door Construction:**  
70mm super-strong, highly insulating polyurethane core.  
High strength, expanded steel and metal reinforcing.  
Double rebate draft seal with GRP inner frame.  
Handmade, triple glazed decorative units.  
Double steel hinge bolts and lifelike grain.

**44mm Door Construction:**  
44mm super-strong, highly insulating polyurethane core.  
Double glazed Q seal warm edge super spacer system.  
Timber frame effect raised mouldings.  
Flush fit and lifelike grain.

Shown in Anthracite Grey

Furniture Shown: Karcher Handle shown in Stainless Steel, SB27 clear visible border is 25mm.

Please note 'Tea staining' on stainless steel components is common and is caused by the oxidisation of surface contaminants on stainless steel. It is not an indication of quality and does not affect the structural integrity or the longevity of the material and periodic cleaning of the stainless steel trims will reduce the likelihood of tea staining.

## ANTI-VIRAL Door Handle

Our new anti-viral handle has an antimicrobial surface. Its high level of hygienic safety has been confirmed in independent laboratory and practical tests.

The coating on the handle contains silver ions that prevent the growth of germs.

The silver destroys the cell membrane of the germs and therefore blocks cell respiration and cell ingestion. Cell division stops; the germ dies.

Independent tests have shown that the ion coating reduces the growth of germs in this way by more than 99% - even with regular cleaning, and it requires no maintenance.

1. High bacterial load on the surface

2. Silver ions destroy the cell membrane of the germ

3. Germ is killed

4. There is a significant reduction in the bacterial load on the surface
